Separate Financial **Statements**

Fourth Quarter 2020

December 31, 2020
(Comparative figures as of December 31, 2019)

STATUTORY AUDITOR'S REPORT

To the Shareholders of CONSTRUCCIONES EL CÓNDOR S.A. Audit Report of the Separated Financial Statements

Opinion

I have audited the separated financial statements of CONSTRUCCIONES EL CONDOR S.A. and its subsidiary companies at December 31, 2020, which comprise the results per duty and other integrated results, the changes in equity, and the cash flow statement ended on that date and the corresponding notes, including a summary of the significant accounting policies

In my opinion, the separated financial statements I audited exhibit, in all significant and reasonable manner, the separated financial situation of CONSTRUCCIONES EL CONDOR S.A. and its subsidiary companies at December 31, 2020, the results of their operations and cash flows for the year ended on that date, in accordance with the Accounting and Financial Information Standards accepted in Colombia.

Basis for my opinion

I have conducted the audit in accordance with the International Audit Standards (IAS) accepted in Colombia. My responsibility, according to these standards, is described ahead in the section of responsibilities of the Statutory Auditor in terms of auditing separated financial statements. I am independent from the Company and its subsidiary companies pursuant to the Code of Ethics for Accounting Professionals through the International Auditing and Assurance Standards Board (Code of Ethics of the IAASB), and I have met the other ethic responsibilities in accordance with the Code of Ethics of the IAASB and with Law 43 of 1990. I deem that the evidence from the audit I have gathered provided a sufficient and proper basis for my opinion.

Emphasis

Without changing my opinion, I wish to emphasize the Management Report and Note 32 on Highights. Both documents describe the impacts of the COVID-19 virus on the operation and measures taken by Management since the State of Emergency declared by the National Government took place, and the effect on the financial statements at December 31, 2020. My opinion has not been changed regarding this matter.

Key matters of the audit

The key matters of the audit comprise those which, in my professional opinion, have been highly significant during the audit I conducted of the separated financial statements of the period aforementioned. These matters have been addressed in the context of my audit of the separated financial statements in their entirety and to provide my opinion thereof, and I do not state an opinion separate from those matters.

Key Matters	Reply from the Statutory Auditor
<p>1. Reconocimiento de operaciones conjuntas</p> <p>The financial statements of the holding acknowledge - in addition to its assets, liabilities, revenues and expenditures – the items that rise from the contractual agreements of its joint operations, presenting on the separated financial statements its share in the joint assets, liabilities, revenues, costs and expenses.</p> <p>I have considered the joint operations of the separated financial statements as a key matter of the audit given the material effect there is from integrating the items from these operations.</p>	<p>My audit procedures pertaining to the joint operations included</p> <ul style="list-style-type: none"> • Conduct a financial audit of the consortiums with the largest share in the assets, based on the material level of the balance sheets incorporated in the accounting system of the holding company. • Verify the proper incorporation of the balance sheets of the consortiums in which there is a share and their timely accounting. • Review the proper acknowledgement of the consortium certificates.

Key Matters

Reply from the Statutory Auditor

2. Reconocimiento de Ingresos en Contratos

Revenue from construction contracts is recognized in accordance with the performance obligations set forth by the entity, keeping in mind the processes established in the contracts and the application of further stages of IFRS 15.

Acknowledging the revenue from constructions contracts generates material financial assets (accounts receivable). Therefore, I have considered that the revenue from contracts with clients is a key matter of the audit.

My audit procedures pertaining to revenue from contracts included:

- Verify the proper accounting acknowledgement of the revenue base don every performance obligation set forth by the Company and further stages established in IFRS 15.
- Review the existence and term of the contracts and their corresponding extensions.
- Verify the existing invoicing and control procedures.
- Verify that the sales are recorded in the proper period and the completion of operations is accordingly made.
- Conduct balance sheet confirmation procedures with clients, and analytical proceedings.
- Validate the integrity of the accounts receivable acknowledged and their valuation based on work progress made.
- Verify the misstatement analysis acknowledged of the accounts receivable.

Other matters

The separated financial statements of CONSTRUCCIONES EL CONDOR S.A. and its subsidiary companies at December 31, 2019, which are part of the information on the financial statements attached, were audited by another public accountant assigned to Crowe Horwath, in accordance with the international audit standards accepted in Colombia. The foregoing unqualified opinion was provided on February 24, 2020.

Responsibilities of management and those responsible for the corporation's governance pertaining to the separated financial statements

Management is responsible for the preparation and fair presentation of these separated financial statements in accordance with the Accounting and Financial Information Standards accepted in Colombia and the internal control which management deems necessary for the preparation of separated financial statements free from material misstatement, whether due to fraud or error.

To prepare the separated financial statements, Management is responsible for the assessment of the Group's capacity to continue as a company to operate, disclosing properly the matters related to the business in operation, following the accounting principle of business in operation except if Management's intent is to liquidate the Group or cease its operations, or there is no other realistic alternative.

Those responsible for the entity's governance are responsible for the supervision of the financial information process thereof.

Responsibility of the Statutory Auditor pertaining to auditing the consolidating financial statements

My purpose is to obtain reasonable assurance about whether the separated financial statements are free of misstatements, due to fraud or error, and to issue an audit report with my opinion. Reasonable assurance is a high degree of certainty but does not guarantee that the audit made in accordance with IAS always detects misstatements. Misstatements may be due to fraud or error, and considered material if, individually or collectively, they may be foreseen to influence the economic decisions made by the users based on the separated financial statements.

As part of the audit conducted in accordance with IAS, I used by professional judgement and maintained an attitude of professional skepticism during the entire process. I also:

- Identified and assessed the risks of material misstatement in the separated financial statements whether due to fraud or error, designed and implemented audited procedures to meet those risks, and obtained evidence sufficient and proper to provide my opinion. The risk of not detecting a material misstatement whether due to fraud is higher than in the case of a material misstatement due to error, since the fraud may imply collusion, forgery, deliberate omissions, statements intentionally erroneous or evasion of the internal control.
- Obtained knowledge of the internal control relevant for the audit with the purpose of designing audit procedures proper in view of the circumstances.
- Assessed the appropriateness of the accounting policies used and the reasonable accounting estimates made, and the applicable information disclosed by Management.

- Concluded that Management properly uses the accounting principle of the business in operation, and based on the evidenced obtained from the audit, the existence or not of a material misstatement related to events or conditions that may lead to significant doubts about the Group's capability to continue as a business in operation. If I conclude that there is a material uncertainty, attention must be drawn in my audit report to the information disclosed on the separated financial statement or, if said disclosures are not proper, a modified opinion should be given. My conclusions are based on the evidence obtained from the audit up to the date of my report. However, future events or conditions may be causes for the Group to stop being a business in operation.
- Assessed the overall presentation, structure and contents of the separated financial statements, including the information disclosed, and if the separated financial statements represent the transactions and underlying facts in a manner the reaches reasonable assurance.

I contacted Management pertaining to, among other matters, the scope and timing of the planned audit, and the significant findings of the audit alongside any significant impairment of the internal control I identified during the course of the audit.

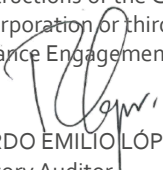

Among the matters object of discussion with those responsible for the entity's governance, I determined those which have been of most significance in auditing the financial statements of the current period, which are, consequently, key matters of the audit. I described these matters in my audit report except when the legal or regulatory provisions prohibit the public disclosure of a matter or, though extremely unfrequently, I determined that a matter should not be disclosed in my report because it is reasonable to expect that the adverse consequences if so may surpass the benefits of the public interest in it.

Report of other legal and regulatory requirements

Management is also responsible for complying with certain regulatory aspects in Colombia related to managing accounting documents, preparing management reports, and the timely and proper payment of contributions to the Comprehensive Social Security System. My responsibility as the Statutory Auditor is to conducts revisions to provide an opinion about the proper compliance.

Based on the results of my audit, I am not aware of situations that show the Corporation's non-compliance of the following obligations: a) Keep the accounting in accordance with the legal regulations and the accounting techniques; b) Duly keep the correspondence, account vouchers as well as the book of minutes and the record of shares. In addition, there is a match between the financial statements attached hereto and the management report prepared by Management, which includes evidence from Management of the free circulation of invoices issued by salespersons or suppliers, and information contained in the payments made to the Comprehensive Social Security System, especially related to the members and their quotation based on their income, which is taken from accounting records. The Corporation is not in default of its payments to the Comprehensive Social Security System; nonetheless, the quotation of payments to the Comprehensive Social Security System for pensions in April and May 2020 (explained in note 12 to the financial statements), were not paid fully based on Legislative Decree 558 of 2020 issued by the National Government, which was declared unconstitutional and with retroactive effects by the Constitutional Court in ruling C-258 of July 23, 2020, and should be paid pursuant to the legal mechanisms determined by the National Government.

In compliance with the responsibilities of the statutory auditor contained in items 1 and 3 of article 209 of the Colombian Trade Code pertaining to the assessment of the activities of the Company's Management and their compliance with the Bylaws as well as the orders or instructions of the General Assembly of Shareholders, and if the measures of internal control, conservation and custody of goods of the corporation or third-parties are in its power, I issued a separate report on February 19, 2021, applying the International Standard on Assurance Engagements 3000 accepted in Colombia.

**CONSTRUCCIONES EL CÓNDOR S.A.
CERTIFICATION OF FINANCIAL STATEMENTS**

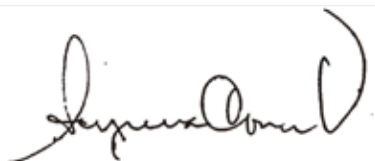

Medellín, February 19, 2021

**Gentlemen
SHAREHOLDERS
CONSTRUCCIONES EL CÓNDOR S.A.
Medellín**

Greetings,

Pursuant to article 47 of Law 964 of 2005, the Legal Representative of Construcciones El Cóndor S.A. informs the shareholders that the operational efficiency of the controls established by the Company were been verified by the undersigned, and that the existing systems have been satisfactorily assessed in terms of financial information disclosure and control. All controls and systems above mentioned were found in proper operation.

Sincerely

LUZ MARÍA CORREA VARGAS
Legal Representative
CC. 42.883.130 de Envigado

**CONSTRUCCIONES EL CÓNDOR S.A.
CERTIFICATION OF FINANCIAL STATEMENTS**

Medellín, February 19, 2021

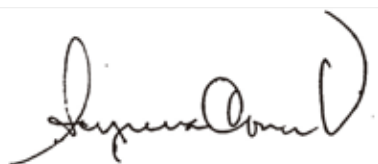

**Gentlemen
SHAREHOLDERS
CONSTRUCCIONES EL CÓNDOR S.A.
Medellín**

The undersigned Legal Representative and the Accountant of
CONSTRUCCIONES EL CÓNDOR S.A.

CERTIFY

That the Separate Financial Statements and other reports relevant to the public and the operations of the Company as of December 31, 2020, do not contain any inaccuracies or errors which restrain from knowing its true equity condition.

The above is to comply with Article 46 of Law 964 of 2005.

CERTIFICATION OF FINANCIAL STATEMENTS

We, LUZ MARIA CORREA VARGAS, acting as the Legal Representative, and ANA ISABEL GONZALEZ VAHOS, acting as the Accountant, hereby state that we have prepared the statements of financial position, comprehensive income, changes in equity and cash flows as of December 31, 2020 of CONSTRUCCIONES EL CÓNDOR S.A. with Tax I.D. No. 890.922.447- 4. This task was prepared applying the International Financial Reporting Standards applicable in Colombia affirming that they reasonably present the financial standing as of December 31, 2020, and furthermore:

1. We are responsible for the reasonable preparation and presentation of the financial statements of the Corporation, and hereby state that the figures were truly taken from the official accounting books and their corresponding complementary documents.
2. We are not aware in any way of:
 - Irregularities involving members of the administration or employees, which may hinder the financial statements of the Corporation.
 - Communications from regulators which by law should exercise control over the corporation, due to the breach of legal provisions in force or to the improper presentation of the information requested.
 - Possible breach of laws or regulations that may create lawsuits or taxes, with effects that should be deemed worth disclosing on the financial statements or taken as a foundation to estimate contingent liabilities.
 - Assets or liabilities other than those registered in the books, or revenues or costs that hurt the results and that should be disclosed in accordance with the International Financial Reporting Standards of Colombia.
3. The Corporation has satisfactorily protected all of the assets it owns as well as those of third parties in its power; there are no pledges or liens on said assets.
4. The Corporation has fully met all contractual agreements which if breached could have an effect on its financial information.
5. No events subsequent to the statement of financial position have taken place that could require an adjustment or disclosure on the financial statements as of December 31, 2020.

Notes to the financial statements As of December 31, 2020 and 2019

Note 1. General Information

1.1 Entity and corporate purpose

CONSTRUCCIONES EL CÓNDOR S.A. was initially established through Public Deed No. 510 filed at the 11th Notary Public of Medellín, on March 6, 1979, and has undergone several amendments in public deeds filed with the Medellín Chamber of Commerce. The Corporation shifted from Limited Liability to Stock Corporation through Public Deed No. 944 filed with the 7th Notary Public of Medellín on April 8, 1994.

Public deed 3385 dated December 12, 2008 formalized the merger by absorption agreement of Construcciones El Cóndor S.A., which absorbed Grupo Cóndor Inversiones S.A.

Public deed 2868 dated November 30, 2009 filed with the 7th Notary Public of Medellín formalized the merger by absorption agreement between the Construcciones El Cóndor S.A., which absorbed AGREGADOS SAN JAVIER S.A.

The corporate purpose of the Corporation is the study, design, planning, contracting, implementation, construction, financing, exploitation, and administration of infrastructure businesses as well as the execution of all its own activities and works involved in engineering and architecture in all their manifestations, modalities, and specialties, inside and out of Colombia. The corporate purpose also includes mining exploitation, the construction of all manner of civil works such as dams, overpasses, etc., and the investment and use of the Corporation's resources established in any of the manners authorized by Law.

Overall, the Corporation may perform all the acts necessary or related to develop its corporate purpose.

Duration: The Corporation's duration extends to March 6, 2079.

The Corporation's main place of business is in the city of Medellín.

Since the Corporation issues shares and its capital is registered with the Colombian Stock Exchange (Bolsa de Valores de Colombia), the Colombian Financial Superintendence holds an exclusive control over the Company.

The financial statements were authorized by the Board of Directors on February 25, 2021. The General Assembly of Shareholders may amend the financial statements before their publication; the General Assembly of Shareholders authorized the publication of the financial statements on March 26, 2021.

Note 2. Main accounting policies and practices.

2.1 Summary of the Corporation's main accounting policies

The accounting principles used by the Corporation are based on the assumption of continuity of the accounting entity, ongoing business, unless otherwise indicated. The Corporation is an entity with a history as an ongoing concern due to the economic movement of its operations and to the time available to continue operating in the future, according to its incorporation documents.

2.2 Bases for preparation

2.2.1 Declaration of compliance

The financial statements have been prepared according to the Accounting and Financial Information Standards (AFIS) accepted in Colombia, set forth in Law 1314 of 2009, and regulated through the Sole Regulatory Decree 2420 of 2015, which are compiled and updated in Decree 2270 of 2019. The AFIS are based on the International Financial Information Standards

(IFIS) and interpretations thereof, published by the International Accounting Standards Board – IASB. The underlying standards are those translated into Spanish and published on January 1, 2018.

2.2.2 Bases for measurement

The financial statements have been prepared using reasonable value to measure the assets, liabilities, equity, and income statements. The reasonable values were:

- Cost
- Sale or market value
- Net present value
- Reasonable value

Reasonable value

The price received for selling an asset or paid for transferring a liability in a transaction ordered among market players.

2.2.3 Bases for causation accounting

The Company prepares its financial statements, excluding information about cash flows, using the bases for causation accounting.

2.2.4 Operating currency

CONSTRUCCIONES EL CÓNDOR S.A. will indicate in the headings to the financial statements its operating currency, which is the Colombian peso.

2.2.5 Relative importance and materiality

Omissions or inaccuracies in the items are material (or are of relatively importance) if they can, individually or as a whole, impact the economic decisions made by the users based on the financial statements. Materiality shall depend on the magnitude and nature of the omission or inaccuracy, judged according to the specific circumstances in which they have occurred.

The evaluations and decisions needed to prepare the financial statements should be based on what is relatively important, for which good professional judgement is needed. The concept of materiality is closely related to the concept of full disclosure, which only refers to relatively important information.

The financial statements must disclose all relevant items that impact evaluations or decisions.

in adopting the International Financial Information Standards, materiality or relative importance for Construcciones El Cóndor S.A. was defined by Management on the basis of a critical component for the company which is profit before taxes, at a rate of 8%; this percentage is evaluated at the end of the reporting period.

2.2.6 Current and non-current assets and liabilities

Construcciones el Cóndor S.A. classifies its assets and liabilities in the statement of financial position as current and non-current. An asset is defined as current: when the entity expects to trade the asset or intends to sell it or use it in its normal operations; holds the asset mostly for trading purposes; expects to dispose of the asset within the 12 months following the reporting period; over the asset is cash or cash equivalent, unless it is restricted for a period of at least twelve months after the reporting period. All other assets are classified as non-current. A liability is defined as current when the company expects to sell the liability during its normal operations or holds it mostly for trading purposes.

2.2.7 Responsibility for the information, estimates and accounting judgements used

Preparation of the Company's financial statements requires Management to make certain judgments and estimates based on experience, historical events, and expectations about the results of future events. Although it is true that these hypotheses are made with the most accuracy possible following the provisions of IFRS 8 – Accounting policies, changes in accounting estimates, and errors – any changes to the estimates that might be required in the future will be applied

prospectively as of that time, recognizing the fact of the change on the statement of results for the corresponding period. The estimates carried out as of the date on which the financial statements are presented are shown below:

- Provision for inventory according to the realizable net value (RNV) and/or impairment.
- Impairment of financial assets
- Impairment of the value of nonfinancial assets
- Age premium
- Actuarial calculation
- Provisions and contingencies
- Realizable Net Value for Noncurrent Assets held for Sale
- Measurement of income and expenses related to construction contracts according to the percentage completed
- Deferred taxes

2.2.8 Changes in accounting policies

Construcciones El Cóndor S.A., will change its accounting policies only if required by another IRFS or its financial statements will provide more reliable and relevant information about transactions that affect financial position, financial yields, or cash flows.

Changes to an accounting policy will be handled as follows:

If the change to the policy is voluntary, the initial balances of each component will be adjusted, affecting the oldest previous period as if the policy had always been applied (retroactive application), unless its application is not possible.

If the policy change is due to the initial application of an IRFS standard, the company will follow the temporary provisions specified in the IRFS if the new IRFS does not include any temporary provisions. Application will be retroactive unless it is impossible to do so. In that case, it will be applied prospectively with the appropriate disclosure.

If the IRFS is applied early, it will be taken as if it were a change in policy due to the initial application of a new IRFS.

Changes in accounting estimates will be recognized prospectively affecting the results for the current and future periods.

Construcciones El Cóndor S.A. will correct material errors from previous periods retroactively in the first financial statements published after the errors are discovered, re-expressing the comparative information for the previous period or periods during which the error occurred, unless it is impossible to determine the resulting effect.

2.2.9 Subsequent events

Construcciones el Cóndor S.A. will take into account all favorable or unfavorable events that take place from the end of the reporting period to the date in which the financial statements are approved for publication.

Events indicating conditions that occurred after the reporting period do not require adjustments to the financial information for the reporting period. In that case the event will be disclosed.

2.2.10 Applicable standards

The IFRS includes the standards and interpretations adopted by the IASB. The list of standards used to prepare these financial statements is shown below:

International Accounting Standards (IAS)

IAS 1 Presentation of financial statements

IAS 2 Inventory

IAS 7 Cash flow statement

IAS 8	Accounting policies, changes in accounting estimates, and errors.
IAS10	Events occurred after the date of the Balance Sheet.
IAS 12	Income taxes
IAS 16	Property, plant and equipment
IAS 19	Employee benefits
IAS 20	Government subsidies and other government aids
IAS 21	Effects of fluctuation in foreign exchange rates
IAS 23	Costs for loans
IAS 24	Information to be disclose about related parties.
IAS 26	Accounting and financial information of retirement benefit plans
IAS 27	Consolidated and separate financial statements.
IAS 28	Investments in associated companies
IAS 32	Financial instruments: Presentation and information to be disclosed
IAS 33	Earnings per share
IAS 34	Intermediate financial information
IAS 36	Asset impairment
IAS 37	Provisions, Contingent assets and contingent liabilities
IAS 38	Intangible assets
IAS 39	Financial instruments: Recognition and measurement
IAS 40	Investment properties

International Financial Information Standards (IRFS)

IFRS 3	Combination of businesses
IFRS 5	Noncurrent assets held for sale, and discontinued operations
IFRS 7	Financial instruments: information to be disclosed
IFRS 8	Operation segments
IFRS 9	Financial instruments
IFRS 10	Consolidated financial statements
IFRS 11	Joint agreements
IFRS 12	Disclosure of interests in other entities.
IFRS 13	Reasonable value
IFRS 15	Revenue from ordinary activities derived from contracts with clients
IFRS 16	Leases

CINIF 1	Changes in existing liabilities due to dismantling, restoration, and the like.
CINIF 10	Intermediate financial information and value impairment.
CINIF 23	Uncertainty of tax treatment of earnings

2.3 Summary of main accounting policies applied

2.3.1 Cash and cash equivalents

The cash and cash equivalents recognized in the financial statements consist of cash at hand and in bank accounts, term deposits, and other liquid and on-demand investments that do not have any restrictions as to their use during the normal course of operations.

Foreign currency will be recognized at its equivalent value in the legal tender at the time the operations are performed, applying the current rate of exchange to the amount in foreign currency.

Cash, restricted cash, and cash equivalents will be measured subsequently according to their reasonable value. Variations in the reasonable value will be recognized in the statement of results.

2.3.2 Financial assets

The Company will recognize a financial asset or a financial liability in its statement of financial position when, and only when, it becomes part of the contractual clauses of the instrument.

The Company will classify financial assets whether they are later valued at their amortized cost, reasonable value with changes in another integrated result, or at reasonable value with changes in results, based on the following two criteria:

- (a) The business model used by the Company to manage financial assets, and
- (b) The characteristics of the financial asset's contractual cash flows.

A financial asset must be valued at its amortized cost if the following two conditions are met:

- (a) The financial asset is held in a business model whose objective is to hold financial assets to obtain the contractual cash flows, and
- (b) The financial asset's contractual terms give rise, on specific dates, to cash flows that are only payments for principal and interest on the outstanding principal balance.

A financial asset must be valued at its reasonable value with changes to another integrated result if the following two conditions are met:

- (a) The financial asset is held under a business model whose objective is achieved by obtaining the contractual cash flows and selling financial assets, and
- (b) The financial asset's contractual terms give rise, on specific dates, to cash flows that are only payments for the principal and interest on the outstanding principal balance.

A financial asset must be measured according to its reasonable value with changes in the results, unless it is measured at its amortized cost or reasonable value with changes in other integrated results. However, the company may make the irrevocable choice, at the time of initial recognition, to present subsequent changes to the reasonable value in another integrated result for specific investments in equity instruments which, otherwise, would be measured at their reasonable value with changes in the results.

The Company will classify all financial assets as subsequently measured at their amortized cost.

Except for commercial accounts receivable, at the time of initial recognition, an entity will value a financial asset or a financial liability at its reasonable value, plus or minus, –in the case of a financial asset or a financial liability that is not accounted for at reasonable value with changes in results—, the transaction costs that are directly attributable to the acquisition or issue of the financial asset or the financial liability.

The Company in the initial recognition will measure the trade accounts receivable for their transaction price (as defined in IFRS 15), if the trade accounts receivable lack a significant financial component according to IFRS 15.

At the time of initial recognition, the Company will measure commercial accounts receivable at their transaction price (as defined in IFRS 15), if such commercial accounts receivable lacks a significant financial component, as determined by IFRS 15.

After their initial recognition, the company will measure a financial asset using:

- (a) Amortized cost.
- (b) Reasonable value with changes to another integrated result.
- (c) Reasonable value with changes to results

Impairment of financial asset value

At the end of each reporting period, the Corporation determines whether there is any objective evidence to indicate that the value of a financial asset or a group of financial assets is impaired.

The Company recognizes expected credit losses using a simplified approach. The expected credit losses from a financial instrument are measured in such a way as to reflect:

- (a) A non-biased weighted probability that is determined by evaluating a range of possible results,
- (b) The value of money over a period of time, and
- (c) Reasonable and verifiable information that is available without disproportionate cost or effort on the date of presentation of past events, current conditions, and forecasts about future economic conditions.

Write off the accounts

The Company will write off the accounts a financial asset when, and only when:

- (a) The contractual rights over the financial asset's cash flows expire, or
- (b) The financial asset is transferred.

The company transfers a financial asset if, and only if:

- (a) It transfers the contractual right to receive a financial asset's cash flows, or
- (b) Retains the contractual right to receive the financial asset's cash flows but assumes the contractual obligation to pay them to one or more beneficiaries.

2.3.3 Investments in associated companies and joint ventures

An associated company is an entity over which the investor has a significant influence. Significant influence refers to the power to intervene in the financial policy and operating decisions of the entity that receives the investment, but without having control or joint control of the receiving entity.

A joint venture is a type of agreement in which the parties have joint control of the agreement and have rights over the net assets of the joint venture. These parties are called participants in the joint venture. Joint control requires the unanimous agreement of the parties that share control.

Construcciones el Cóndor, shall use the participation method for later measurement of these investments, provided the company wields a significant influence.

According to the equity method, the investment in the associated company and the joint venture are initially recognized at cost. The book value of the investment is adjusted to recognize changes in the Corporation's participation in the net assets of the associated company or joint venture as of the date of acquisition. The commercial credit related to the associated company or the joint venture includes the book value of the investment. This credit is neither amortized nor subjected individually to value impairment tests.

The financial statement for the associated company and the joint venture are prepared for the same reporting period as the Corporation's. If necessary, appropriate adjustments are made to adapt their accounting policies to the Corporation's accounting policies.

After applying the participation method, the Corporation determines whether it is necessary to recognize a loss due to impairment of the value of the investment that the Corporation has in the associate or the joint venture. On each closing date for the reporting period, the Corporation determines whether there is objective evidence that the investment in the associated company or the joint venture has been impaired. Should such evidence exist, the Corporation determines the amount of impairment as the difference between the recoverable amount from the associated company or joint venture and their respective book values, and then recognizes the loss in the item "Participation in the associated company and joint venture's net profit", in the statement of results.

In the event of loss of significant influence over the associated company or joint venture, or of joint control over the joint venture, the Corporation measures and recognizes and remaining investment at its reasonable value.

2.3.4 Joint operations

A joint operation is an agreement through which the parties that hold joint control of the venture are entitled to the assets and to the obligations of the liabilities related to the joint venture. These parties are called joint operators.

A joint operator shall recognize its assets, liabilities, income, and the expenses incurred together.

A joint operator will account for the assets, liabilities, revenue from ordinary activities, and expenses related to its participation in a joint venture, according to the applicable IFRS, specifically with respect to assets, liabilities, income from ordinary activities, and expenses.

The financial information about the joint operation is prepared for the same period as the information for the Corporation. If needed, appropriate adjustments will be made to adapt its accounting policies to the Corporation's accounting policies.

2.3.5 Investments in subsidiary companies

A subsidiary is an entity controlled by the investor. Control is attained when the investor is exposed or is entitled to variable profits from its participation in the entity that receives the investment and can affect those profits through its power over the receiving entity. Specifically, the investor controls an entity that receives the investment if, and only if, the investor has:

- a) Power over the entity that receives the investment (i.e., there are rights that grant the investor the current capability to direct the relevant activities of the entity that receives the investment).
- b) Exposure or right to variable profits from its participation in the entity that receives the investment.
- c) Ability to use its power over the entity that receives the investment to significantly affect its profits.

In the initial recognition, the Corporation uses cost to account for investments in subsidiaries. Subsequently, the Corporation applies the participation method to value those investments.

2.3.6 Inventory

The Company recognizes the inventory when it has control over it, when it expects to gain future economic benefits from it, and when the inventory's cost can be reliably determined.

Inventories are assets kept for sale during the normal course of operations, in the production process to be sold, or as supplies to be used for the production process or to provide services.

Inventories are valued at the lower between cost and the net sales cost. The cost of acquiring the inventories will include purchase price, import duties, and other taxes (that cannot be recovered later from the tax authorities), transportation, storage, and other costs that are directly attributable to the acquisition of inputs and parts. Commercial discounts, price reductions and other similar items will be deducted from the acquisition cost.

Inventories are valued using the weighted average method.

The net realizable value will be determined at least once a year.

2.3.7 Intangible assets and prepaid expenses

CONSTRUCCIONES EL CÓNDOR S.A. should recognize as an Intangible Asset all those assets that can be identified, of a non-monetary nature, and without physical form, if and only if:

- a) It is likely that the future economic benefits attributed to the asset will go to the company.
- b) The cost of the asset can be reliably determined.
- c) Is separable, i.e., it can be separated or split from the company and sold, transferred, assigned for exploitation, leased, or traded, regardless of whether the company intends to perform said separation.
- d) Arises from contractual rights or from other legal rights, regardless of whether those rights are transferable or can be separated from other rights and obligations.

Intangible assets acquired separately are initially valued at cost. After the initial recognition, intangible assets are accounted for using the cost model, i.e., cost minus any accumulated amortization and minus any accumulated loss due to impairment of its value.

Internally produced intangible assets, excluding development expenses, are not capitalized and are shown in the statement of results for the period in which they are incurred.

The amortization methods used by CONSTRUCCIONES EL CÓNDOR S.A. will be straight line, production units, or revenue from ordinary activities produced by an activity that includes the use of an intangible asset. Amortization will begin when the asset is at the location and in the condition required to operate as intended by management. This amortization will stop on the earlier between the date on which the asset is classified as held for sale and the date on which the asset is taken off the books.

Category	Amortization Method	Useful Life
Insurance and bonds	Straight line	According to the duration of the contract.
Software licenses	Straight line	1 year.
Mining rights	Production units	N/A
Operation rights	Based on the revenue from ordinary activities associated with the operation	Amortization is expected to end in June 2020.

Useful life and estimates of intangible assets are reviewed at the end of each reporting period. Any changes will be treated as provided for in IFRS 8.

Profits or losses arising from taking an intangible asset off the books are measured as the difference between the net revenue from the sale and the asset's book value. Such profits or losses are recognized in the statement of results when the asset is taken off the books.

2.3.8 Property, Plant, and Equipment

Property, Plant, and Equipment is understood as the group of assets of CONSTRUCCIONES EL CÓNDOR S.A. that meets the following criteria:

- Physical or tangible items.
- Available for use by CONSTRUCCIONES EL CÓNDOR S.A. to create future benefits for the Corporation, either through its own use or by leasing them to third parties.
- Their useful life is equal to or greater than 12 months.

CONSTRUCCIONES EL CÓNDOR S.A. will recognize Property, Plant, and Equipment items as assets if, and only if:

- The future economic benefits associated with the asset will go to the Corporation.
- The cost of the asset can be reliably determined.

In addition, it has been decided that any items that cost more than 50 Minimum Legal Monthly Wages shall be recognized as Property, Plant, and Equipment.

A Property, Plant, and Equipment item will be measured according to its cost.

The cost will be the price equivalent to cash on the date on which it is recognized. The disbursements that make up the cost are:

- The price of acquisition, including import duties and non-recoverable direct taxes, after deducting any discounts or price reductions.
- All the costs directly involved in putting the asset in place and in the conditions required to operate as intended by management.
- Dismantling costs, according to NIC 37 — Provisions, contingent assets and liabilities.

Disbursements

The Company shall recognize disbursements as Property, Plant, and Equipment:

- Additions or major maintenance: These disbursements will be recognized as Property, Plant, and Equipment if they have the effect of increasing the value and/or useful life of the asset or reduce the costs. When these criteria are not met, they will be amortized according to the time of association to the main asset.
- Replacements of Property, Plant, and Equipment: the replaced component will be written off the books.

Cost model

After being recognized as an asset, a Property, Plant, and Equipment item will be accounted for at cost minus accumulated depreciation and accumulated losses due to impairment of its value.

Revaluation model

After being recognized as an asset, a Property, Plant, and Equipment item with a reasonable value can be reliably determined and accounted for at its revalued amount, which is its reasonable value at the time of revaluation, minus any loss due to impairment of its value. Revaluations will be carried out frequently enough to ensure that the book value at any time does not differ significantly from the value that could be determined using reasonable value at the end of the reporting period.

Depreciation

Depreciation of a Property, Plant, and Equipment asset is carried out systematically during its useful life. It is recognized as of the time the asset becomes available for use (whether it is used or not) and will only stop when it is classified as an asset being held for sale and when the asset is taken off the books. The method used will be the straight-line method.

Leased assets will be depreciated using criteria similar to those applied to the set of owned assets.

Class	Future Valuation Model	Useful Life (years)
Land	Revaluation model*	
Buildings and constructions**	Revaluation model*	100
Construction in process	Cost model	
Machinery	Revaluation model*	5 - 20
Office equipment	Cost model	10
Computer and communications equipment	Cost model	3
Fleet and transportation equipment	Revaluation model*	8 - 15
Mines and quarries***	Revaluation model*	250,000 mt ³ /Year
Property, Plant, and Equipment in transit	Cost model	

* Valuations are conducted every 3 to 5 years, and the resulting profits or losses will be recognized in the equity, in another integrated result.

** The useful life of constructions and buildings will be determined using the estimated useful life (100 years) minus the time elapsed since the property was built.

*** For mines and quarries, a depletion method is used according to the number of cubic meters removed.

The Corporation will use the straight-line depreciation method.

In practice, the residual value of an asset is often insignificant and, therefore, irrelevant for calculating the depreciable amount. As an internal policy, the Corporation estimates 10% of the asset's value as the residual value, for the following classes of assets:

- Machinery and equipment
- Fleet and transportation equipment

If there is any indication that there has been a significant change in an asset's depreciation rate, useful life, or residual value, the depreciation of that asset is reviewed, and a prospective adjustment will be made to reflect the new expectations. That review will take place at least at the close of each period being reported.

2.3.9 Leases

The Company may decide not to recognize:

- (a) Short-term leases; and
- (b) Leases in which the underlying asset is low value

If the Company decides not to apply the requirements of short-term lease o leases in which the underlying asset is low value, the lessor will recognize lease payments as a linear expense during the term of the lease or according to any other systematic method.

Lease identification and duration

At the beginning of the contract, the Company will determine whether the contract is or contains a lease. A contract is or contains a lease if it transfers the right to control the use of a specific asset for a specific period of time in exchange for some consideration.

The Company will determine the term of the lease as the non-cancelable period as well as:

- (a) the periods covered by an option to extend the lease if the lessor is reasonably certain to exercise that option, and
- (b) the periods covered by an option to terminate the lease if it is reasonably certain that the lessor is not going to exercise that option.

When evaluating whether it is reasonably certain that a lessor is going to exercise the option to extend the lease, or will not exercise the option of terminating the lease, an entity shall take into consideration all relevant facts and circumstances that give rise to an economic incentive for the lessor to exercise the option of extending the lease or to not exercise the option of terminating it.

A lessor shall again determine whether it is reasonable to exercise an option to extend or not to exercise the option to terminate the lease, when an event or significant change in circumstances occurs such that:

- (a) The amount of the initial valuation of the lease liability.
- (b) Lease payments made before or as of the start date minus any lease incentives received
- (c) Direct initial costs incurred by the lessor, and
- (d) An estimate of the costs to be incurred by the lessor to dismantle and eliminate the underlying asset, restoring the place where the asset is located, or restoring the underlying asset to the state required by the terms and conditions of the lease, unless these costs are incurred to produce inventory. The lessor acquires obligations as a result of these costs, either on the starting date or as a result of having used the underlying asset during a specific period.

On the start date, the Company will measure the liability at the present value of the lease payments that have not been paid on that date. Lease payments will be discounted using the interest rate implicit in the lease if that rate can be easily determined. If that rate cannot be easily determined, the lessor will use the incremental rate for loans from the lessor.

On the start date, lease payments used in the determination of lease liabilities include the subsequent payments for the right to use the underlying asset during the term of the lease that are not paid on the start date:

- (a) Payments minus any incentives for leases receivable;
- (b) Variable lease payments that depend on an index or a rate, measured initially using the index or rate on the start date;
- (c) Sums that the lessor expects to pay as guarantee for the residual value;
- (d) The price of exercising a purchase option if the lessor is reasonably sure to exercise that option; and
- (e) Payments for penalties arising from the termination of the lease, if the term of the lease indicates that the lessor will exercise an option to terminate the lease.

The Company, in keeping with its Property, Plant, and Equipment policy, has chosen to measure subsequently the rights of use for the following kinds of assets:

Class	Subsequent Measurement Model
Land	Revaluation model
Constructions and buildings	Revaluation model
Machinery	Revaluation model
Fleet and transportation equipment	Revaluation model

In turn, financial liabilities are subsequently measured as follows:

- (a) Increasing the book value to reflect the interest on the liability for the lease;
- (b) Decreasing the book value to reflect lease payments made; and
- (c) Measuring again the book value to reflect the new measurements or changes to the lease, and to reflect the essentially fixed lease payments that have been revised.

2.3.10 Coss for loans

The costs for loans directly attributable to the acquisition, construction, or production of an asset that requires a substantial amount of time to be available for its expected use or sale, are capitalized as part of the respective assets. All other costs for loans are accounted for as expenses in the period in which they are incurred. Loan costs include interest and other costs incurred by the entity by entering the loan agreements.

An eligible asset is an asset that requires a substantial amount of time to be ready for use or sold. Construcciones El Cóndor S.A. considers that a substantial period of time is greater than six months. The Corporation deems that any agreements that involve an operating license (intangible assets model) meet the requirements to meet the specification of an eligible asset.

2.3.11 Investment properties

Investment properties are recognized as assets when, and only when:

- a) It is probable that the future economic benefits associated with such investment properties will go to the entity, and
- b) The cost of the investment properties can be reliably measured.

Investment properties are initially measured at cost, including transaction costs, and excluding the regular investment property maintenance costs.

After the initial recognition, investment properties are measured using the cost model, taking into consideration the useful economic life for its straight-line depreciation. Any subsequent changes in the measurement model are accounted for

when the period changes, as appropriate, and are treated as changes in accounting policies.

Investment properties are taken off the books either when they are sold or when they are permanently withdrawn from service and no economic benefit is expected to be recovered through its sale. The difference between the net revenue from the sale and the book value of the asset is recognized in the statement of results for the period in which the asset is written off the books.

For a transfer of an investment property to a Property, Plant, and Equipment item, the cost used for its subsequent accounting is its reasonable value on the date of the change in use. If a Property, Plant, and Equipment item becomes an investment property, the Corporation must account for it according to the policy defined for property, plant and equipment on the date when the use is changed.

2.3.12 Non-current assets held for sale, and discontinued operations

Non-current assets and groups of assets for disposal that are classified as being held for sale are measured at the lower of the book value and the net realizable value (reasonable value minus sale costs). Non-current assets are classified as being held for sale if their book value will be recovered mostly through a sale transaction instead of their continued use. This condition is deemed to have been met when the sale is highly probable and the asset or group of assets for disposal are available, in their current state, for immediate sale. Management must be committed to the sale and it should be expected that the sale meets the conditions to be recognized as a sale during the year following the classification.

Property, Plant, and Equipment, and intangible assets, after being classified as being held for sale, are not subject to depreciation or amortization.

2.3.13 Value impairment of non-financial assets

On the closing date for each reporting period, Construcciones El Cóndor S.A. checks whether there is any indication that an asset's value might have been impaired. If there is any indication, or when impairment tests are required for an asset, the Corporation must estimate the amount recoverable for that asset. The recoverable amount for an asset is the higher of its reasonable value minus the sales costs, and the value of using either an asset or a cash producing unit. It is estimated for an individual asset, unless the asset does not produce cash flows that are substantially independent from the remaining assets or groups of assets. When the book value of an asset or a cash generating unit exceeds its recoverable value, the asset will be considered impaired and its value is reduced to its recoverable value.

To determine the value in use, the estimated cash flows are discounted to their present value using a discount rate before taxes that reflect current market assessment of the value of money over a period of time and the asset's specific risks. To determine the reasonable value minus estimated cost of sale), recent market operations, if available, are used, if the most appropriate valuation model is not used.

Losses due to impairment of the assets' value are recognized in the statement of results in the expense categories that relate to the function of the impaired asset, except for previously revalued property in which the surplus from the appreciation was recorded in another integrated result (equity). In that case, the impairment of the value is also recognized in the other integrated result (equity) for up to the amount of any surplus due to appreciation previously recognized.

On the closing date for each reporting period, an evaluation is performed for assets in general to see if there are any indications that the losses due to value impairment that were previously recognized no longer exist or have decreased. If such indications exist, the Corporation estimates the amount that can be recovered from the asset or cash generation unit. A loss due to impairment that was previously recognized is only reversed if there has been a change in the assumptions used to determine the amount that can be recovered from an asset since the last time the value impairment was recognized. The reversal is limited so the book value will not exceed its recoverable value, or the book value that would have been determined, net of depreciation, if a loss due to impairment had not been recognized for the asset in previous periods. This reversal is recognized in the statement of results, unless the asset is accounted for using its revalued value. In that case, the reversal is treated as an increase in the revaluation.

2.3.14 Current and deferred income tax

The expense for income taxes for the period includes current income tax and deferred income tax. Deferred taxes are recognized in the results for the period, except for items that are recognized in the equity of another integrated result. In those cases, the taxes are also recognized respectively in the equity or in the integrated results.

Management does regular evaluations of the position taken in the tax returns about situations in which tax laws are subject to interpretation. When appropriate, the Company sets up provisions for the amounts it could expect to pay to the tax authorities.

The provision for deferred taxes is established in its entirety using the liability method based on any temporary differences between the tax bases for assets and liabilities. The deferred taxes are calculated according to the announced tax rates to be applied to the fiscal profits (losses, if any) for the periods in which the asset for deferred taxes is expected to be realized or the deferred tax liability is expected to be paid.

Deferred income tax assets are only recognized to the extent of the likelihood of having future tax benefits vis-a-vis which the temporary differences can be applied.

Asset or liability deferred taxes are offset when there are legally enforceable rights to offset current tax assets against current tax liabilities, and when the asset and liability deferred income taxes relate to the income tax imposed by the same tax authority.

The Company revised the uncertainties related to the income tax open to inspection. As to the uncertain tax treatments which concluded that it would be unlikely for the authority to accept the treatment given by the Company, the uncertainty effect is reflected to determine the liquid income or fiscal loss to calculate the deferred tax and fiscal loans not used.

Resolution settings were set for every treatment and each was assigned the likelihood of occurrence, considering the professional judgement, the doctrine issued by DIAN and the case law related to the uncertain tax position analyzed. The expected value method was used to determine the effect of the uncertainty, including sanctions thereof.

The term likely in the uncertain tax position matches the meaning provided in IAS 37 "Provisions, Assets and Contingent Liabilities", that is, there is 50% more likelihood that the uncertain tax treatment is accepted by the tax authority.

2.3.15 Financial liabilities

Recognition and initial measurement

Financial liabilities are classified as: loans, accounts payable to related parties, commercial accounts payable, and other accounts payable. The Corporation determines de classification of financial assets at the time they are initially recognized.

All financial liabilities are recognized initially at their reasonable value plus directly attributable transaction costs, for loans and accounts payable. The Corporation's financial liabilities include commercial accounts payable, loans, and other accounts payable.

Subsequent measurement

After the initial recognition, the company measures financial liabilities as the amortized cost using the real interest rate. Profits and losses are recognized in the statement of results.

Account write-offs

A financial liability is written off when the obligation specified in the respective agreement has been paid or cancelled or has expired.

When an existing financial liability is replaced with another from the same lender under substantially different conditions, or if the conditions of an existing liability are substantially modified, that modification is treated as a write-off of the original liability and the recognition of a new liability, and the difference in their respective book values is recognized in the income statement.

2.3.16 Employee benefits

On the date of this document, the Corporation has employee benefits with short- and long-term characteristics.

Short-term employee benefits are those (other than termination) benefits whose payment will be made in full within the twelve months following the close of the period during which the employees have rendered their services. Those benefits are recognized by El Cóndor S.A. on a discounted basis and recognized as an expense as the service is received.

The employee seniority bonus is considered a long-term benefit.

Construcciones El Cóndor S.A. implements a plan defined benefits and uses actuarial assumptions to measure the obligations assumed and the expense for each period. In addition, the Corporation considers the possibility of getting actuarial profits or losses. In addition, obligations are measured according to their discounted values because there is the possibility that they will be met many years after the employees have rendered their services.

2.3.17 Provisions, contingent liabilities, and contingent assets

A contingent liability is created when there is a possible obligation arising from past events and the existence of which must be confirmed just by the future occurrence or not of one or more uncertain events that are not completely under the entity's control, or when there is a current obligation that arises from past events and for which it is not probable that an outflow of resources involving economic benefits will be needed to pay for the obligation, or the amount of which cannot be reliably measured.

When contingencies are probable, the Corporation sets up a provision using the best estimate possible with the information available at the time. If the contingency is possible, this fact is disclosed in the notes to the financial statements.

Contingent assets

A contingent asset is an asset whose nature is possible nature that arises from past events, whose existence must be confirmed only by the occurrence or not of one or more future events that are not entirely under the entity's control. Contingent assets are not recognized in the Statement of Financial Situation. However, under certain circumstances, information about them is disclosed in the Notes.

The entity will not recognize a contingent asset in the statement of financial situation. It will only be disclosed in the Notes.

2.3.18 Revenue from ordinary activities

The basic principle of IFRS 15 is that an entity recognizes revenue from ordinary activities in such a way that it represents the transfer of goods or services committed to the clients in exchange for a sum that represents the consideration to which the entity expects to have the right in exchange for those goods or services. Construcciones El Cóndor S.A recognizes the revenue from ordinary activities according to this basic principle by going through the following stages:

1. Identify the contract with the client
2. Identify the performance obligations in the contract
3. Determine the price of the transaction
4. Allocate the price of the transaction among the performance obligations
5. Recognize the revenue from ordinary activities as the entity meets its performance obligation

The Company will recognize revenue from ordinary activities when (or as) it meets a performance obligation by transferring the committed goods or services (that is, one or several assets) to the client. An asset is transferred when (or as) the client acquires control of that asset.

For each performance obligation that is identified, the Company will determine, at the start of the contract, whether it will meet the performance obligation over a period of time or at a specific time. If an entity fails to meet a performance obligation over a period of time, that obligation is met at a specific time.

The Company transfers control of a good or service over a period of time and, therefore, meets a performance obligation and recognized the revenue from ordinary activities over a period of time if one of the following criteria is met:

- (a) The client simultaneously receives and uses the benefits provided by the entity's performance as the entity performs them.
- (b) The entity's performance creates or improves an asset (for example, work in progress) that the client controls as it is being created or improved.
- (c) The entity's performance does not create an asset with an alternative use for the entity, and the entity has an enforceable right to be paid for the performance that has been completed until that date.

If a performance obligation is not met over a period of time, the Company will meet it at a specific time. To determine the specific time when a client gets control of a committed asset and the company meets an obligation to perform, the company will consider indicators for transferring control including, without limitation:

- (a) The Company has a current right to receive payment for the asset—if a client is currently obligated to pay for an asset, that could be an indication that the client has received in exchange the ability to redirect the asset's use and to receive substantially all the remaining benefits.
- (b) The client is legally entitled to the asset—the legal right might indicate what part of a contract can redirect the use of an asset and receive substantially all its remaining benefits, or to restrict access by other entities to those benefits. This is the reason why the transfer of the legal right to an asset might indicate that the client has obtained control of said asset. If an entity maintains the legal right only as protection against the client's failure to pay, the entity's rights will not prevent the client from getting control of an asset.
- (c) The entity has transferred physical possession of the asset—a client's physical possession of an asset might indicate that the client has the ability to redirect the use of the asset and to receive substantially all its remaining benefits, or to restrict access to those benefits by other entities. However, physical possession might not indicate control over an asset.
- (d) The client has the significant risks and rewards of ownership of the asset—transfer to a client of significant risks and rewards of ownership over an asset could mean that the client has acquired the ability to redirect the use of the asset and to receive substantially all the asset's remaining benefits. Nevertheless, when evaluating the risks and rewards of ownership over a committed asset, an entity will exclude any risk that gives rise to a separate performance obligation in addition to the obligation to transfer the asset.
- (e) The client has accepted the asset—the client's acceptance of an asset might indicate that the client has acquired the ability to redirect the use of the asset and receive substantially all its remaining benefits. To evaluate the effect of a contractual clause on the client's acceptance as to when control over an asset is transferred.

For each performance obligation met over a period of time, the Company will recognize revenue from ordinary activities over a period of time, measuring progress towards the full performance of that obligation. The purpose of measuring progress is to represent an entity's performance in transferring control of the goods or services committed to the client (i.e., meeting an entity's performance obligation).

The Company will apply a single method to measure progress in each performance obligation that is met over a period of time and will apply it consistently to similar performance obligations in similar circumstances. At the end of each presentation period, an entity will again measure its progress towards total fulfillment of a performance obligation met over a period of time.

Appropriate methods to measure progress include product and resources. To determine the appropriate method to measure progress, the company will consider the nature of the good or service that it is committed to transfer to the client.

2.3.19 Measuring reasonable value

Reasonable value is the price that would be received when selling an asset or when paying for transferring a liability in an orderly transaction among market participants. This definition of reasonable value emphasizes that it is a market-based

measurement and not a specific measurement by a corporation. When measuring reasonable value, a corporation assumes that market participants would use to determine the price of the asset or liability under current market conditions, including assumptions about risk. Therefore, the intention of a company to hold an asset or liquidate it, or otherwise meet a liability, is not relevant when measuring reasonable value.

For disclosure purposes, the standard requires that the input data for the techniques used to measure reasonable value be classified in three levels. The reasonable value hierarchy assigns the highest priority to the (unadjusted) prices quoted in active markets for identical assets and liabilities (Level 1 input data) and the lowest priority to non-observable input data (Level 3 input data).

Level 1 input data are (unadjusted) prices quoted in active markets for assets or liabilities that are identical to those the company can access on the date of measurement. Level 2 input data are different from the quoted prices included in Level 1 which can be directly or indirectly observed for the assets or liabilities. Level 3 input data are non-observable data for the asset or liability.

2.3.20 Operating segments

An operating segment is a component in an entity that carries out business activities from which it can derive income from ordinary activities and incur in expenses, and its operating results are regularly reviewed by the highest authority that makes decisions about the entity's operations, the resources to be assigned to the segment, and evaluate its performance, and about which differentiated financial information is available.

The Corporation currently has two operating segments: Construction and Investments.

2.3.21 Foreign currency conversion

The financial statements for Construcciones El Cóndor S.A. are presented in Colombian pesos which is the Company's functional and presentation currency.

Transactions and balances

Foreign currency transactions are initially recorded at the respective rates of exchange for their functional currencies on the date of the transaction.

- Monetary assets and liabilities in foreign currency are converted at the rate of exchange of the functional currency on the closing date for the period being reported. Any differences are recorded in the statement of results, except for those items that are recognized in equity. Any tax effects attributable to the differences in rate of exchange of those monetary items are also recorded under equity.
- Non-monetary items measured at their historic cost in foreign currency are recorded using the rate of exchange applicable on the date of the original transaction.
- Non-monetary items measured at their reasonable value in foreign currency are converted using the rate of exchange applicable on the date on which the reasonable value is determined.

Conversion of an overseas business

The conversion of results and financial situation of a business in a foreign country is as follows:

- Assets and liabilities in each statement of financial position presented (including comparative numbers) will be converted using the closing rate of exchange on the date of the respective statement of financial situation.
- Income and expenses for each statement in the results for the period and another integrated report will be converted using the rate of exchange applicable on the date of the transaction. For this purpose, the average rate of exchange during the period being reported will be used.
- All the resulting differences will be recognized in another integrated result.

2.3.22 Government subsidies and other government aids

The Company will apply the provisions set forth in this standard when:

- a. Resources are transferred to offset compliance (future or past) of certain conditions related to the operating activities of the Company;
- b. Government subsidies may be in cash (monetary assets) or in kind (non-monetary assets);

This Standard is not applicable for:

- c. Government subsidies which cannot be reasonably assigned an amount;
- d. Transactions with the government which cannot be distinguished from the other normal operation of the Company; and
- e. Government subsidies covered by IAS 41.

Recognition

Besides their character, subsidies are recognized solely if there is reasonable assurance that the Company will meet the conditions tied them and will receive indeed the resources transferred.

Subsidies not tied to the future compliance of certain stocks and transfers made via compensation for expenses or losses incurred and immediate financial aid, will be recognized in the period's result and becomes demandable.

Measurement

The Company shall apply the income method to involve the concept of expenses and costs incurred in compliance with the obligations held. Hence, this provides a balanced reading of the management made through the income statement.

Presentation

Government subsidies shall be presented in the period's result under "Other Revenue", though this fact will include a specific note on the revelations.

Cases of government subsidies related to assets, including non-monetary to the reasonable value, may be presented on the statement of the financial situation under deferred revenue or as a lower value of the assets they relate to. In the first case, a revenue handled systematically should be correlated. In the second place, it should be treated as an expense reduction by depreciation. Nonetheless, both cases should be presented in an item separate from cash flows.

Information to disclose

The Company will disclose the presentation method adopted in its financial statements, the nature and scope of government subsidies recognized on its financial statements, and the moment when the conditions breached and other related contingencies related to government subsidies or government aid received..

2.3.23 Risk management

2020 was a year like no other and made us face new challenges derived from sudden and unforeseen changes in our surroundings. The Crisis Committee, headed by the President of the Company and every manager, led and steered the actions needed to face these changes as a result of the serious consequences of the "COVID-19" virus, which was declared by the World Health Organization as a pandemic, with devastating effects to the global economy.

The Company's Crisis Committee made a daily analysis of the developments of the National Emergency and of the guidelines set by the national and local government. Consequently, the Committee designed, implemented and monitored strategies aimed to protect the employees' health and to protect the Organization from the effects of this global situation, preventing the materialization of strategic risks that would hurt business continuity.

2020: Risks aligned with the Strategy

The challenges of 2020 brought about rethinking the Company's strategic planning. For this exercise, the Organization understands that risk management creates value by identifying and managing events that could hurt meeting the strategy's objectives and path while preventing and mitigating negative impacts, or seizing the opportunities. The overall purpose

is to protect the Company's value, creating value for its shareholders, complying with the clients' expectations and the wellbeing of its employees, and meeting the commitments made with the other stakeholders.

The Company's major risks are:

Financial Risks: Adverse events that may hurt the profitability of projects and investments, the invoicing expected, and the proper cash flow needed to back the Company's operation and to meet the commitments made with funders.

Compliance: Adverse situations that hinder compliance with the requirements established by clients and funders for the normal development of projects within the terms set forth.

Social and Environmental: External events that create difficulties to execute projects with the costs and times established.

Business: The assignment of risks related to the business' conditions and fierce competition with local and foreign players.

Regulations: Changes and limitations in applicable regulations, standards and norms.

Business Ethics, MLTF and Crimes from these Sources: Money laundering, terrorism financing, bribery, disloyal practices and other events that go against business ethics and contradict the corporate values – committed by employees, partners, suppliers and contractors.

Human Talent: Inability to withhold and attract the best talents.

As to financial risks, details of these and the measures Management implemented are described below:

Liquidity Risk

This is one of the Company's priority risk and managed by senior management using a specific asset management plan, debt profile adjustments, and ongoing project management, monitoring profitability, invoicing goals and releasing trapped funds.

In March 2020, as a result of the mandatory isolation measures enforced by the National Government, the Company – like all in entire infrastructure sector – was forced to suspend the operation of its projects. However, the Company acted fast and adapted to the new setting, applying the biosafety protocols rigorously, which in turn led to gradually reopen the projects. Nonetheless, a decrease of the invoicing expected took place while working capital needs increased. In addition, the deleverage plan was hurt by several delays experienced in the disinvestment plan's execution, also caused by effects of the pandemic.

The Company's experience and positioning as a strong player in the sector, its stronghold in corporate governance, its swift capacity to respond and proper risk management – all enable it to project these capacities as competitive edges in public and private bids and hence, include the backlog thereof. As a result, \$780.000 million pesos were added in 2020 after being awarded the EPC Autopista Rio Magdalena contract.

On the other hand, and despite the difficulties experienced in 2020, the Company met its financial obligations, which in turn protected the jobs and health of its employees.

Lastly, the Company managed its capital structure and made pertinent adjustments based on the changes in economic conditions. To maintain and adjust the structure, the Company can finance in the capital market using other debt financial instructions.

	Less than 1 Year	1 – 5 Years	More than 5 Years	Total
Financial obligations	103.546.442	157.870.774	0	261.417.216
Bonds	281.500.000	36.500.000	0	318.000.000
Leasing	45.609.843	85.698.153	11.352.565	142.660.561
Commercial accounts payable	157.961.469	450.221	0	158.411.690
Other accounts payable	21.370.093	0	0	21.370.093
Total	609.987.847	280.519.148	11.352.565	901.859.560

Market risk

Market risk is the risk that the reasonable value or future cash flows of the financial instrument vary because of changes in the rate of interest in the market. Market prices involve three types of risks: interest rate risk, exchange rate risk and other price risks.

Interest rate risk

The Company's exposure to the market's interest rate risk is mainly related to short and long-term financial obligations with variable interest rates.

The Company is exposed to variations in rates of interest and/or inflation, mainly due to the relevance of working capital financing, which is due to the high cost of the works implemented in this sector. Expectations about inflation as well as liquidity conditions can affect the rates of intervention. Should interest rates increase, the company's financial expenses and its investments in associated companies, joint ventures, and subsidiaries, could increase and affect the company's liquidity and profitability.

The Company manages interest rate risk by diversifying its fixed and variable interest rate debt. Variable interest financial obligations are indexed to the IBR and DTF plus the respective percentage points.

Interest rate risk sensitivity analysis consists of determining the impact of financial expenses on the statement of results due to a variation (increase/decrease) of 1 percentage point in the indexed rates of interest (IBR or DTF plus percentage points). As of the date of these financial statements, the balance for financial obligations and leases is \$404.077.776 while the impact on the results from a variation of 1 percentage point in the rates of interest would be \$4.040.778. Though this risk is monitored, its impact is so low that it is not part of the priority financial risks of the Company, and it is managed through the operations of the Company.

Rate of exchange risk

Rate of exchange risk is the risk that the reasonable value or future cash flows from a financial instrument change due to variations in the rates of exchange. The company's exposure to the rate of exchange risk refers, first, to commercial accounts payable and other accounts payable in foreign currency; and second, to the company's investments overseas.

The largest risk to the Company is the fact that construction machinery and equipment is purchased mostly from foreign suppliers and, therefore, the prices are mostly in dollars. Therefore, a material devaluation of the peso vis-à-vis the dollar would significantly increase the funds that must be spent by the issuer for investments both for maintenance and for growth. This would have a negative impact on the profitability of its projects and would decrease the amount of free cash available for dividends. Notwithstanding the above, the effect of the devaluation would be short-term because the construction market passes this higher cost on to the prices of its offers and offsets the negative effect that an increase in the rate of exchange might have.

The projects' structuring bears this aspect in mind to prepare the economic proposal, seeking coverage through structuring and narrowing down contractual risks due to unforeseen events.

As a result of the dollar's volatility in 2020, although increased costs for spare parts of heavy machinery were observed, the Company did not require major investments in fleets since the execution of the projects underway was already consolidated. Nonetheless, several imported items did increase due to the increasing value of the dollar. This information is analyzed in accounts payable.

At the close of the period, the Company has a net exposure in accounts receivable in U.S. dollars of \$1,002,933. If the exchange rate were to increase or decrease by 450 pesos, the impact on the results would be \$451,347.

Likewise, the Company has a net exposure in accounts payable in U.S. dollars of \$179,482,92 and in Euros of \$8,808. If the exchange rate were to increase or decrease by 450 pesos, the impact on the results would be \$80,767 and \$3,964, respectively.

Other price risks

The Company is not exposed to other price risks because it does not have other financial instruments such as quoted raw materials, investments in shares traded in the stock market, etc.

Credit risk

Credit risk is the risk that a counterpart will not meet its obligations from a financial instrument or a commercial contract, and that leads to a financial loss. The company is exposed to credit risk because of its operations (specifically due to commercial debtors) and their financial activities, including their deposits in banks and financial institutions, and other financial instruments.

Cash and cash equivalents

The company's cash is held at AAA rated financial institutions. The Auditing and Risk Management Committee ensures that the actions of the Treasury follow company policies.

Commercial accounts receivable and other accounts receivable

Commercial accounts receivable concentrate mostly in the execution of works that the Company carries out directly or through consortiums whose clients are Concessions which are considered related parties (associates, joint ventures, or subsidiaries) to the company. Therefore, Construcciones El Cóndor S.A. is constantly managing the liquidity of these investments focusing on the following three main components: (i) getting the financial closing for which the company contributes its experience to the concessionary, (ii) getting the disbursement of the resources according to the financial closing, and (iii) the difficulty to determine the total contribution of the company's own capital (equity) to finance the works.

The other accounts receivable are mostly the equity contributions made to the concessions (related parties) as subordinates according to each concession contract. The subordinate debt contracts define the rate of interest (indexed to the DTF) to be paid by the resources, with the expectation that the cash flows for interest and principal will return to the company in over 5 years.

Accounts receivable from Concessions or other contracts in which the Company does not participate like an investor but instead as an execute, undergo the contractual management required to convene forms of payment, default interests, and policies required for non-compliance of payments; all of these actions are measures to manage this risk.

In addition, the Company implements legal procedures to collect its receivables that are over 150 days past due. Accounts receivable and their due dates are reviewed each year, and any necessary accounting and tax provisions are established, as determined by Financial Management and Works Management using all the legal tools and follow-up available.

The book value of commercial accounts receivable and other accounts receivable as of the date on which these financial statements are presented, will be paid according to the following time frames:

	Less than 1 Year	1 – 5 Years	More than 5 years	Total
Commercial accounts receivable and other accounts receivable	339,321,090	4,928,988	0	344,250,078
Accounts receivable from related parties	406,872,968	120,895,504	574,624,825	1,102,393,297
Total	746,194,058	125,824,492	574,624,825	1,446,643,375

2.3.24 Joint operations

Collaboration Contracts Business	Shareholding	Clase de Acuerdo	Description of the agreement	Duration	consortiums
Consortio Autosur	50%	consortium	Maintenance of the section between Santander General School and Villavicencio City Avenue; to the Transmilenio system belonging to the SOUTH sector of the NQS trunk.	60 months	Construcciones el Cóndor S.A. 50%, Construcciones Civiles 50%
Consortio Hidroeléctrica de Tulúa	65%	consortium	Awarded by EPSA S.A. for the construction of civil works, the Alto Tulúa Hydroelectric plant, the Bajo Tulúa hydroelectric plant and the construction and improvement of access roads and bridges for both projects	Until the final settlement of the same	Construcciones el Cóndor S.A. 65%, Estyma S.A. 35%
Consortio Grupo Ejecutor Hatovial	21,109%	consortium	The purpose of the consortium is to carry out all the activities of design, construction and services included in the new object of the concession contract, and all those that are subsequently subscribed between the Department of Antioquia and Sociedad Hatovial SA. Set the rules, parameters and conditions that will govern it, and the conditions of participation of each of the members.	The agreement will be valid from the date of its subscription and until the end of the concession contract signed by Hatovial or until its members decide, in the latter case in which unanimity will be required. Construcciones El Cóndor S.A., in addition to its own assets, liabilities, income, and expenses, recognizes in its accounting those items that arise from contractual agreements, showing in its financial statements the Company's share of the joint assets, liabilities, revenue, costs, and expenses. The inclusion of the balances for consortia and temporary unions can be seen in the notes to the financial statements identified with a (*).

2.3.25 New standards and interpretations for financial reports

IFRS 17 - Insurance Contracts becomes effective on January 1, 2021. The preliminary analysis of this standard carried out by the company has concluded that the scope of IFRS 17 does not include the operations carried out by the Company and, therefore, Construcciones El Cóndor will not apply the provisions of this standard.

Note 3. Cash and cash equivalents

The total of these items was duly reconciled with the corresponding external information obtained from different financial entities. Includes a portfolio of investments in pesos in joint accounts receivable; there are no restrictions regarding balance of cash available, banks and savings accounts on the financial statement's date.

(1) ASSOCIATES

(1.1) La Pintada Concession: Investment transferred as a non-current asset held for sale. A sale and purchase agreement was signed between Construcciones El Cóndor SA, and West Valley JL Holdco Limited, a company belonging to the John Laing Group plc, for the sale of the 21.15% stake equivalent to 8,490,799 ordinary shares that the Seller has in the company. Concession La Pintada SAS as well as the assignment of the creditor position in subordinated debt contracts and other rights derived from them.

(1.2) Argos Aggregates: Sale of 1,520,000,000 shares to Cementos argos S.A., The operation does not generate relevant profits.

(1.3) Loss of control Concesión Ruta al Mar S.A.S.: As of the date of presentation of these financial statements, Construcciones El Cóndor has lost control over the Ruta al Mar SAS Concession, due to the fact that all the preceding conditions were accredited and the authorizations required for the completion of the sale contract signed between Construcciones were obtained. The Condor SA and InfraRed Infrastructure RAM, S.L., With this operation, Construcciones el Cóndor has a 50% stake in the Ruta al Mar S.A.S Concession, considering it as a joint business.

(2) INVESTMENTS IN SUBSIDIARIES

Selma Industry: Related company domiciled abroad. Dissolved according to BVI Company No. 1512839, Investment valued at \$ 0, due to the associate's losses.

2.1) Condor Investment USA INC: related company domiciled abroad.

(2.2) CONCESIÓN VÍAS DE LAS AMERICAS S.A.S., established by shareholders' meeting minutes dated August 5, 2010 under number 0140918 of book IX

Concesión Vías de las Américas, the primary corporate purpose is to study, design, plan, exploit and manage the infrastructure business and to execute all of the activities related to engineering and architecture in all their manifestations, modes and specialties inside and out of Colombia under any system. To develop its corporate purpose, the corporation may: execute activities of design and construction of civil works, infrastructure of all types, project management, and toll collection and management, road operation and road maintenance activities, and road infrastructure. To enter and execute the concession contract that corresponds to public bid SEA-LP-002-2009 for the works necessary for the construction, revamp, expansion, improvement and conservation, whichever the case, of road project Transversal de las Américas.

Construcciones El Cóndor S.A. acquired 100% of the rights of Organización de Ingeniería Internacional S.A. (ODINSA) in the Concesión Vías de las Américas S.A.S. which corresponded to 33,34% with which it acquires control of the entity. As part of the payment, Bancolombia authorized the novation for change of debtor in the equity contract for COP \$ 41.675.000, replacing ODINSA with Construcciones El Cóndor S.A.

To date, there are pledges on shares to guarantee the payment of obligation acquired with Bancolombia. For the loan, Construcciones El Cóndor S.A. granted a pledge in favor of the bank without hold in the first degree all of the shares owned of Vías de las Américas S.A.S. for the amount of \$8.665.800.

(2.3) CONCESSION CESAR -GUAJIRA S.A.S. It was incorporated with a private document dated June 12, 2015 from the sole shareholder, registered with the Medellín Chamber of Commerce on June 19, 2015, in book 9, under number 11719.

The CONCESSION CESAR-GUAJIRA S.A.S. Its sole corporate purpose is to execute the concession contract under the public-private association (APP) scheme in the terms of Law 1508 of 2012, derived from the awarding act of the VJ-VE-APP-IPV-003-2015 process, issued by the National Infrastructure Agency through resolution No. 823 of May 19, 2015 and whose purpose is the construction, rehabilitation, operation and maintenance and reversal of the road system for the connection of the departments of Cesar and La Guajira in accordance with the contract concession.

By means of an act signed between the National Infrastructure Agency and the Cesar Guajira S.A.S. Concession, the occurrence of a cause for early termination and the beginning of the contract reversal stage was declared.

All intangible assets are measured after their initial recognition by the costs model. The methods used to amortize intangible assets are:

Intangible asset	Amortization method
Mining rights	Protection units
Operation rights	Based on revenues from normal activities

Assets for deferred taxes

The deferred tax was found using the liability method and the tax rate to which the differences are expected to revert.

	As of Dec 31 2020	As of Dec 31 2019
Deferred taxes for provisions	129.705	365.190
Deferred taxes for financial obligations	6.000.375	8.781.141
Other deferred taxes	4.855.679	5.263.651
TOTAL ASSETS FOR DEFERRED TAXES	10.985.759	14.409.982
TOTAL EXPENSES PAID IN ADVANCE, INTANGIBLES AND DEFERRED TAXES	28.512.239	22.952.680

Deferred income tax assets

On December 31, 2018 Construcciones El Cóndor S.A. value the following kinds of property, plant and equipment: land, constructions and buildings, machinery and equipment, transportation equipment and mining assets. The reasonable value such assets was determined by the following independent firms: AGS Gestión Contable S.A.S., Juan David Chavarría Avalúos and Avatec Ingeniería.

The reasonable value of land, constructions and buildings was determined by referring to market-based evidence. This means that the valuations carried out by the asset layers were based on active market prices. For the valuation, level 2 entry data were used.

The fair value of machinery and equipment and transport equipment was determined using the cost approach, in which the Ross Heidecke methodology was used, said method, based on the fact that a new good provides its services satisfactorily, but after a certain time its deterioration becomes visible and intolerable; That is why initially the loss in value of the asset is small and accelerates as its useful life elapses. Level 2 input data were used for the assessment.

The fair value of mining assets was determined by applying the income approach, in which the discounted cash flow method is used to measure the asset's ability to generate future wealth, cash flows are discounted at an interest rate determined by the CAPM methodology. Level 3 input data were used for the assessment.

These values are not distributable to shareholders until the associated property, plant and equipment elements are realized.

The Company has established in its policy the following life of its assets, which was determined by homogenous group.

Fixed Assets	Life (years)
Constructions and buildings	40 a 100
Machinery and equipment	5 a 20
Office equipment	10
Computers and communications equipment	3
Fleet and transportation equipment	8 a 15
Mines and quarries	60

As an internal policy, the Company adopts a residual value of zero for buildings, computer equipment and office equipment. For the fleet and transport equipment, the residual value corresponds to 10% of the initial cost of the asset.

The Company has formalized insurance policies to cover the possible risks to which the various elements of property and equipment are subject.

The company only has ownership restrictions on its assets acquired through financial leasing.

Note 10. Investment properties

	Net cost	Net cost
Real estate investment properties	6.078.358	6.226.910
Impairment investment properties	(491.034,00)	(491.034)
TOTAL INVESTMENT PROPERTIES	5.587.324	5.735.876

Several assets of the Company: Two lands in the municipality of Copey meet the IAS 40 criteria to be recognised as investment properties.

The assets of Construcciones El Cóndor S.A. registered as properties, plant and equipment do not guarantee any type of obligation.

Note 11. Financial obligations

TOTAL COMMERCIAL ACCOUNTS PAYABLE AND OTHER CURRENT ACCOUNTS PAYABLE	157.961.469	199.545.300

- (1) Financial liability for issuance of commercial papers was recognized
 (2) This value includes accounts payable to: consortia, dividends, capitalization of subordinated debt, sale of Concesión Túnel de Oriente.
 (3) Of this amount, \$ 1,316,810 corresponds to what was left unpaid in the months of April and May for the reduction of Pension contributions under Decree 558 of 2020.
 Given that this decree was later declared unconstitutional with retroactive effects, by the Constitutional Court through judgment C-258 of July 23, 2020, this liability must be paid in accordance with the legal mechanism defined by the national government.

Deposits

The deposits correspond to payments made to the companies, with the objective of future capitalization and correspond to Equity contributions derived from the cash flow needs of the projects.

The company does not recognize implicit financing for sundry debtors and deposits due to the levels of uncertainty regarding the time in which these accounts receivable will be canceled, for this reason, no terms or interests are established for these accounts.

Note 31. Reclasificaciones

For comparability purposes with the financial statements as of December 31, 2020, some figures of the financial information as of December 31, 2019 were reclassified.

Note 32. Highlights

Impact of the COVID-19 virus on the financial statements

Prior to the declaration of the State of Emergency by the National Government through Decree 417 of 2020, Construcciones El Cóndor began the implementation of the Crisis Management Plan to respond immediately to the impacts and emerging risks caused by the sudden and unforeseen changes in the environment, derived from the spread of the Covid-19 virus, as well as the mandatory preventive isolation and social isolation measures, decreed by the National Government.

The magnitude of the impacts is being consolidated and analyzed by the Crisis Committee; however, it has already been identified that the total billing goal for the year 2020 will be reduced, and we are currently determining the real impact; Similarly, increases in project operating costs and idle resource costs that were available during the mandatory isolation time have been identified.

In development of the measures adopted by the company, the activities in the administrative headquarters were suspended from March 16, 2020, allowing the development of work at home and, by virtue of the regulations issued by the National Government, collective vacations were determined in all projects, extending this measure to administrative positions from April 1 to April 15, 2020.

After April 13, 2020 and when the execution of infrastructure works became one of the excepted activities in decree 531 of April 8, 2020, the Crisis Committee proceeded to activate simultaneously different strategies aimed at implementing the restart of work. in the projects and gradually regularize, and adopting the appropriate measures, all its operations as soon as possible, taking care of the risks so that the safety of people and the execution of the works are maintained with the quality levels required by our clients and established in the organization, safeguarding the interests of the interested parties, the reputation of the company and maintaining the differentiating elements that add value. For this, biosafety protocols were designed within the framework of the guidelines established by the Ministry of Health, and work was done hand in hand with local authorities and communities in order to obtain the necessary authorizations for the restart of activities.

On April 16, 2020, we were able to start mobilizing the necessary resources to activate the different work fronts, gradually and progressively reincorporating the personnel required to carry out the preliminary activities for the restart, and supplying the required supplies, guaranteeing the application of biosafety protocols and restart plans to avoid trips and difficulties with the authorities and protect staff and the community.

While the exceptional situation of the State of Emergency is maintained, the Senior Management will continue to make a weekly review of the strategic and operational risks, establishing and implementing actions for their mitigation, for which financial projections were made to December 2020 considering compliance with the commitments made by the company, identifying potential cost savings and analyzing the company's debt and financial health structure.

The year-end results reflect impacts on the operation caused by Covid-19, such as: lower margins in some projects, longer terms in the payment of capital and interest on financial obligations, The Company is constantly evaluating its assets that may involve recognizing impairment.

The agreements reached with banks and some creditors allowed the transfer of financial obligations, lease liabilities and accounts payable from the short to the long term. The company is up to date on the rest of its current obligations.

Divestment strategy of the mature assets that Construcciones El Cóndor has as a financing mechanism

Regarding debtors and accounts receivable: the impairment policy continues to be applied, it should be noted that there have been no changes in the negotiations or in the terms.

In investments in subsidiaries, associates and joint ventures: There is still no evidence of impairment, taking into account factors such as:

Guaranteed minimum income, contracts awarded in force, negotiations with financial entities, the value of the asset has not decreased significantly, the legal and economic environment in which they operate has not had significant changes, the economic performance of the asset is as expected.

The impact of execution by COVID is an unforeseen event that has generated lower performance because people have had to isolate themselves.

To mitigate these times and fences, Construcciones el Condor implemented greater numbers of tests, thus, if a person has symptoms, a fence of 4 or 6 people is made according to the contact, tests are carried out and this allows to have fewer people isolated for less time and to resume the project.

Cesar Road Network Concession

Merger by Absorption: On March 7 (7), 2017, the private document was registered in the commercial register by which the merger by abbreviated absorption was approved by virtue of which, Construcciones el Cóndor S.A. absorbs its subsidiary Concesión Red Vial del Cesar S.A.S.

As a consequence of the above, the company Concesión Red Vial del Cesar S.A.S., is dissolved without being liquidated.

The value of the assets and liabilities that were incorporated as part of the combination due to the merger of the company Concesión Red Vial del Cesar S.A.S. were:

Assets	\$5,488,199
Liabilities	\$439,41

Out of a total of 2,747,400 ordinary shares, Construcciones El Cóndor S.A. It owned 2,607,282 shares that represent 94.89%, the difference corresponds to reacquired own shares, for which Construcciones el Cóndor S.A. incorporated 100% of the Company.

(1) Claim submitted to Sociedad Trans NQS SUR S.A.S. due to longer permanence in work and other cost overruns during the execution of commercial offers for the execution of the South NQS to the Transmilenio System, for a value of \$ 20,280,131.

Concesión Cesar Guajira S.A.S

On December 26, 2018, the National Infrastructure Agency (ANI) and the Cesar-Guajira SAS Concession signed a liquidation certificate with exceptions to Concession Contract No. 006 of 205, in said certificate the Agency recognized the amount of \$ 85,235,649,395, however the Concessionaire's claim amounts to \$ 147,050,560,353. According to the Settlement Act, the ANI would pay the recognized value with the resources available in the Autonomous Patrimony administered by Fiduciaria Bancolombia through the PA CESAR-GUAJIRA. On December 27 and 28, 2018 and January 8 and 14, 2019, the Trustee, in

compliance with the provisions of the Settlement Act of the Concession Contract No. 006 of 2015, made transfers in favor of the Concessionaire corresponding to the sums of \$ 70,113,783,646.88, \$ 461,996,308.00 and \$ 4,260,807.39 respectively, with the surpluses of the subaccounts of the ANI Account and the Property, Environmental Compensation and Network subaccounts.

On November 25, 2019, the ANI and the Concessionaire signed a new conciliatory agreement for the payment of the amount of the bilateral liquidation act with exceptions and that was not covered with the resources of the Trust. The new conciliatory agreement that includes the willingness to pay the amount of \$ 14,539,548,261.05 through treasury titles TES, was approved by the Arbitration Court by Order No. 42 of December 10, 2019. In the same minutes the Concession Cesar - Guajira withdraws from the claim of the lawsuit associated with the payment of the GMF in controversy in the amount of \$ 212,438,879.

"On June 23, 2020, the Arbitration Court issued an Arbitration Award in the arbitration process, and in it, and in solution to the controversy presented on September 24, 2017 with reform of the demand of May 24, 2018, it resolved recognize in favor of the Concession, as ARh not recognized in the settlement act of December 26, 2018 the figure of \$ 34,573,471,932.00. Additionally, regarding the application of the liquidation formula, the Court decided to define the following rules:

1. In relation to the figures recognized in the Bilateral Settlement Act by the ANI, in an amount of \$ 85,235,649,395: (a) As variable h) the date of each payment, (b) As variable l), although It was dated December 26, 2018 as it corresponds to the signing of the Settlement Act, its application must be taken into account until August 31, 2018, in accordance with the claims of the lawsuit; (c) The value resulting from the exercise of application of the formula will be updated at the time of payment, having as the start date of the application of the CPI the day following the enforcement of the Award and as the final date, the day on which the obligation remains settled. 2. In relation to the figures that the panel found proven through this Award in the amount of \$ 34,573,471,932.00: (a) As a variable h) the date of each payment; (b) as variable l), although it was dated December 26, 2018, as it corresponds to the signing of the Settlement Act, it must be applied on August 31, 2018, in accordance with the claims of the lawsuit, and (c) The resulting value will be updated with the CPI until the date of execution of this Award and from the day following said execution, the figure will generate remunerative interest at DTF + 9 and after 1800 days the default interest provided for in section 3.7 of the General Part Contract. "

On July 7, 2020, after submitting a request for clarifications and complements by the ANI and the Concession, the Tribunal resolved them by means of Order No. 50, which confirmed the Arbitration Award in all its aspects, without any complementation or clarification, According to the Court's certification, as of this date the Award is enforceable for the purposes provided for therein.

On October 30, 2020, after exhausting the procedure before the ANI and the Ministry of Finance, payment was achieved through TES treasury securities, worth \$ 14,539,548,261.05, corresponding to the Settlement Agreement signed between the CONCESSION CESAR - GUAJIRA SAS and LA AGENCIA NACIONAL DE INFRAESTRUCTURA - ANI on November 25, 2019 and approved by the Arbitration Court by AUTO No. 42 of December 10, 2019

After exhausting the procedure with the ANI and the Ministry of Finance, the payment of the Arbitration Award amounting to \$ 63,394,888,012 was achieved, through TES treasury titles, on December 29, 2020, with this to date there is full payment of the sentences against the National Infrastructure Agency and in favor of the Cesar-Guajira SAS Concession

Tax reform Law 2010 of 2019

In order to correct the declaration of unconstitutionality of Law 1943 of 2018, the Government approved the Law of Economic Growth, the following are the most relevant aspects:

Taxes for legal entities.

* Income tax rate: Gradual reduction is maintained

Year	Rate
2.020	32%
2.021	31%
2.022 en adelante	30%

* Decrease in presumptive income is modified for the year 2020: 0.5%, and from 2021 0%.

* The deduction for taxes paid, fees and contributions is maintained as these will be 100% deductible as long as they have been effectively paid and have a causal relationship, with the exception of income tax, the ICA will be a 50% tax discount for the years 2020, and the 4x thousand is still 50% deductible, (100% as of 2022).

* The deduction for contributions to employee education is maintained.

* Includes first job deduction benefit consisting of a 120% deduction from wage payments made to eligible employees.

* The VAT discount is maintained for real productive fixed assets.

* The dividend tax remains in force, but the applicable rates are modified via withholding.

* The maximum percentage is maintained against costs, deductions and discountable taxes that can be borne without electronic invoices:

Year	Rate
2.020	30%
2.021	20%
2.022 en adelante	10%

* Ratify the audit benefit for taxable year 2020 and extends for taxable period 2021.

* Decrease the term of firmness for the declarations in which tax losses are determined or compensated and the declarations of the taxpayers subject to the transfer pricing regime of 6 to 5 years.

* The term to correct declarations that increase the tax or decrease the balance in favor of 2 to 3 years is increased.

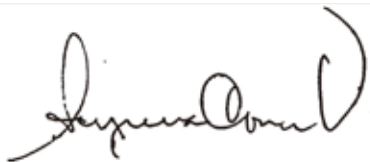

Note 33. Indicators and interpretation

INDICATORS OF RESULTS

Operating Revenues:

Total revenues from normal activities:	794.995.306
Other revenues:	16.076.917
Other gains and losses:	(614.170)
	810.458.053

Operating margin	$\frac{\text{Operating profit}}{\text{Operating revenue}}$	=	$\frac{63.482.440}{810.458.053}$	0,0783	The Company generated an operating profit equivalent to 7.8.0%, with respect to total sales for the period.
LIQUIDITY INDICATORS					
Working capital =	Current asset - Current liability	=	199.545.447		Represents the surplus of current assets (once current liabilities have been canceled) that remain to the Company as permanent funds, to meet operating needs.
Liquidity ratio or index =	$\frac{\text{Current asset}}{\text{Current liability}}$	=	$\frac{880.597.779}{681.052.332}$	1,2930	For every \$ 1 of current liabilities, the Company has a backup of \$ 1.29 in current assets.
DEBT INDICATORS					
Total debt	$\frac{\text{Total liability}}{\text{Total asset}}$	=	$\frac{1.054.787.240}{2.143.263.419}$	0,4921	It reflects the share of creditors on the assets of the Company. For each peso that the Company has in assets, it owes \$ 0.49 cents.
Financial debt	$\frac{\text{Financial liability}}{\text{Total asset}}$	=	$\frac{722.077.775}{2.143.263.419}$	0,3369	It reflects the participation of financial creditors on the assets of the Company. For each peso that the Company has in the asset, it owes \$ 0.33 cents
PROFITABILITY INDICATORS					
Return on Equity (ROE)	$\frac{\text{Net profit}}{\text{Equity}}$	=	$\frac{31.440.615}{1.088.476.179}$	2,8885%	Represents the return generated by the capital investment.
Net margin	$\frac{\text{Net profit}}{\text{Operating revenue}}$	=	$\frac{31.440.615}{810.458.053}$	3,8794%	For each peso sold, the Company generates a net profit / loss of
